Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 17 September 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

DETAILED ACTION

Priority

Receipt is acknowledged of a transmittal letter paper filed under 35 U.S.C. 119 (a)-(d) based on an application filed in EPO on June 19, 2000. There is no priority document attached to the transmittal paper.

Applicant states that a certified copy of the priority document was attached to the transmittal letter mailed 12/3/2001. The transmittal letter is in the file; the priority document is not.

Applicant argues that the application Data Sheet does acknowledge the filing of a foreign application. The application data sheet is now in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The rejection of Claims 1-6, 8-13 under 35 U.S.C. 103(a) as being unpatentable over Wei et al., US 6,245,729 has been mooted by applicant's amendment to claims 1 and 13.

Claims 1-4, 7, 9-13 under 35 U.S.C. 103(a) as being unpatentable over Calton, US 6,068,665 in view of Menkart et al. has been mooted by applicant's amendment to claims 1 and 13.

Claim Rejections - 35 USC § 112

Art Unit: 1751

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no basis in the originally filed specification for the limitation "wherein said first and said compositions are capable of generating heat by contacting each other without adding water during the process." In addition to having no basis for this limitation in the specification, this limitation appears to be contrary to what applicant regards as the invention. Noting all of the examples in the specification on pages 41 and 42, a minimum of 91.1% of water is added to the compositions. Additional evidence that this is not applicant's invention is claims 3, 5, 7 and 12 wherein at least one component is water, or in the case of claim 3, hydration of substantially anhydrous components is required. Additionally, wherever the two component system is mentioned in the specification one of them is preferably water. Water is needed in several of applicant's chemical reactions: acid-base reactions,

Art Unit: 1751

Solubilization of salts, etc. Accordingly, the invention now claimed is not the invention described in the specification.

Claims 1-13 rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for processes wherein water is used, does not reasonably provide enablement for processes wherein water is not added in the process. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. There is no description of the process of the invention wherein heat is generated by contacting two components with each other without adding water during the process.

Claims 3,5,7 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. All of the above claims are improperly dependent on claim 1 because they require the addition of water to the heat generating process.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1751

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
